

9" Hollow Concrete Block (CMU)

Quality solids. Technical datasheet. Generated 2026-04-21.

Summary

Thicker wythe for mid-rise shells, retaining work, and industrial envelopes where you need more mass in the wall.

Specifications

Type	Hollow block
Nominal wythe	9"
Dimensions	Nominal 9" × 8" × 16" (229 × 203 × 406 mm)
Weight	Approx. 38 to 43 lb (17.2 to 19.5 kg) per unit
Compressive strength	Nominal 2,400 PSI. Confirm with batch certs for your tender.
Pricing	On request. Contact sales with project quantity and delivery site.

Applications

Commercial and industrial perimeter walls
Elevator and stair shafts
Mechanical rooms
Foundation walls above grade

Compliance notes

ASTM C90 basis; verify with supplied mill or lab reports.
Control moisture with drainage and coatings as needed.
Coordinate rebar, grout lifts, and structural design with your engineer.

Values marked as nominal or pending certification must be verified against the latest mill test reports before specification on sealed drawings.
